

The Jewett City Dept. of Public Utilities has an employment opportunity for an experienced professional to oversee the day to day operations of a 1.1 mgd advanced wastewater treatment facility and associated collection/pumping systems in accordance with State Regulatory Agencies, Environmental Protection Agency and local ordinances. The candidate supervises all Water Pollution Control Authority staff and is a direct report to the Director of Utilities.

The candidate plans, organizes and supervises the daily work of the utility including schedules, staffing, budgeting, and purchasing. He/she must have a thorough knowledge of equipment, facilities, SCADA, materials, and procedures used in the operation of a waste water treatment facility, have knowledge of chemical, bacteriological and biological systems (including nitrogen and phosphorus removal, u.v. disinfection and solids handling). The successful candidate should possess a working knowledge of laboratory procedures associated with the operation of a wastewater treatment plant.

Minimum 4 to 7 years practical experience in wastewater treatment with at least 2 years in a supervisory capacity. Candidate must have a valid CT Grade 4 wastewater treatment operator's license with some experience in the laboratory. Interested candidates should send resume to: Jewett City Dept. of Public Utilities, 9 East Main Street Jewett City, CT 06351 Attn: Director of Utilities.
